

1. Topic and Purpose:

The site presents **SCEPTIC**, an experimental music and art project that blends genres like ambient, underground hip-hop, and synthesizer-driven sounds. The purpose is to showcase various projects under the SCEPTIC brand, including music, art, and interactive experiences, focusing on the intersection of music, technology, and design.

2. Features Implemented:

- **Audio Interaction on Hover:**
Users can hover over music discs to play different audio tracks using HTML `<audio>` elements, providing an interactive listening experience.
- **Parallax Scrolling:**
The background moves at a different speed than the foreground while scrolling, creating a dynamic, 3D-like effect.
- **Vanta.js Plugin:**
Added the **Vanta.js Topology** effect for interactive, animated backgrounds that react to user mouse movements.
- **Responsive Layout:**
The design adjusts to different screen sizes, ensuring optimal viewing on phones and tablets.
- **Hover Effect for Images:**
Text appears when hovering over images, offering more information without cluttering the page.
- **Embedded Video:**
A **YouTube video** is embedded to showcase relevant content directly on the site through iframe.
- **Card-Based Layout:**
Projects are displayed in a card format, providing images, descriptions, and links for more information.

3. Plugin Documentation:

The site uses **Vanta.js** for interactive visual effects.

- **Vanta.js Documentation Link:**

<https://www.vantajs.com/>

The documentation explains how to configure the Topology effect, including customizable parameters like `backgroundColor`, `color`, and `amplitudeFactor`.
